Screenshots:

The screenshot shows the WOKWI IDE interface. On the left, the Arduino IDE editor displays a C++ sketch for an ESP32-DHT22 sensor. The sketch includes headers for WiFi, PubSubClient, and LiquidCrystal_I2C. It defines an organization 'x9oggs', a device type 'iot_device', a device ID '1234', and a token '12345678'. The sketch sets up a WiFi client and a PubSubClient to connect to the IBM Cloud IoT platform. The main loop publishes temperature and humidity data to a topic 'iot-2/cmd/led/fmt/String'.

```
1 #include <WiFi.h>
2 #include <PubSubClient.h>
3 #include <LiquidCrystal_I2C.h>
4 LiquidCrystal_I2C lcd(0x27, 20, 4);
5
6 #define ORG "x9oggs"
7 #define DEVICE_TYPE "iot_device"
8 #define DEVICE_ID "1234"
9 #define TOKEN "12345678"
10
11
12 char server[] = ORG ".messaging.internetofthings.ibmcloud.com";
13 char publishTopic[] = "iot-2/evt/data/fmt/json";
14 char topic[] = "iot-2/cmd/led/fmt/String";
15 char authMethod[] = "use-token-auth";
16 char token[] = TOKEN;
17 char clientId[] = "d:" ORG ":" DEVICE_TYPE ":" DEVICE_ID;
18
19
20
21 WiFiClient wificlient;
22 PubSubClient client(server, 1883, wificlient);
23
24 #define ECHO_PIN 12
25 #define TRIG_PIN 13
26 float dist;
27
28 void setup()
29 {
30   Serial.begin(115200);
```

On the right, the simulation window shows a virtual circuit diagram of the ESP32-DHT22 sensor connected to a liquid crystal display (LCD). The terminal output shows the following messages:

```
Connecting to Wifi.....Wifi connected, IP address: 10.10.0.2
Reconnecting MQTT client to x9oggs.messaging.internetofthings.ibmcloud.com
IBM subscribe to cmd OK
```

The screenshot shows the IBM Cloud IoT Platform Device Drilldown page for device 1234. The page displays the following information:

- Client Address:** 50.31.197.64 Insecure
- Connection Information:** Recent Events, State, Device Information, Metadata, Diagnostics, Connection Logs, Device Actions.
- Recent Events:** The recent events listed show the live stream of data that is coming and going from this device. The table below shows the data points:

Event	Value	Format	Last Received
data	[{"High_Alert":47.97}]	json	a few seconds ago
data	[{"High_Alert":47.97}]	json	a minute ago
data	[{"High_Alert":47.97}]	json	a minute ago
data	[{"High_Alert":47.97}]	json	a minute ago
data	[{"High_Alert":47.97}]	json	a minute ago

State: This table shows a list of data points that are reported by this device. The table is currently showing raw data and no interfaces are available.

Property	Value	Type	Event	Last Received
High_Alert	47.97	Number	data	a few seconds ago
